

Questionnaire - Installation of a MARINFLOC EBBWCS

Date:.....

Ships Name:		Type of vessel:		Contact name:	
Address:			Tel:		Fax:
The filled in information below will be the basis for the lay out of a Marinfloc EBBWCS or Pre-T EB installation					
Ships Voltage: _____ Volts. _____ Hz:			Classification Society: _____		
Bilge Water production in 24hrs: _____ m ³			Ships nationality: _____		
Size of Bilge Water Holding Tank (BWHT): _____ m ³			Availability of hot fresh water in Engine Room areas: Yes or No		
Type of heating system in BWHT : Control System for heating: Y/N. If Y. Type of:			Type of Fuel Oils used and total consumption/24 hrs: _____ m ³		
Waste Oil (Sludge) production in a month: _____ m ³			Total Lub. Oil Consumption/24hrs: _____ m ³		
Size of Waste Oil/Sludge Holding Tank (WOHT): _____ m ³			Remarks:		
Type of heating system in WOHT : Control System for heating: Y/N. If Y. Type of:					
Present Bilge Water Separator					
Maker:		Type:		Capacity: _____ m ³	
Feeding pump:		Type:		Capacity: _____ m ³	
PPM-Monitor:		Maker:		Type:	
				Year of manufacture: _____	
Detergents for general purposes:			Make & type of:		
Degreaser:			Maker & type of:		
Detergent/solvents for filter Cleaning:			Maker & type of:		
Chemicals used for treatment of cooling Water, feed Water etc: Maker and type :					
Is there a washing machine for overalls etc. in the engine room, discharging to Bilge-wells or holding tank? Y/N					
Are the boilers onboard soot-blown by Water or steam and is drainage connected to Bilge-wells or holding tank? Y/N					
Additional information that may be considered to have a an influence on the Bilge Water and/or waste Oil handling on board.					

NOTE ! To tailor make the MARINFLOC to the actual ships conditions, please enclose to this "Questionnaire":
 -1 lit.(abt) of Bilge Water. Take the sample in the inlet Line of the present Bilge Water Separator. Mark: "BEFORE"
 -1 lit.(abt) of Bilge Water. Take the sample in the over board Line of the present Bilge Water Separator. Mark: "AFTER"
